

Final Project: Digital Presence Project

Objective

Create a complete frontend website for a real or fictional business, organization, or personal brand. The project should demonstrate HTML, CSS, AI-assisted development, GitHub version control, and deployment on Vercel.

Project Requirements

- Choose a real or fictional client (business, NGO, school, portfolio, restaurant, fashion brand, gym, etc.).
- Create at least 5 pages: Home, About, Services/Products, Gallery/Portfolio, and Contact.
- Implement a navigation bar linking all pages.
- Create a hero section with a headline, description, and call-to-action button.
- Include a services/products section.
- Include a contact form (frontend only).
- Add a footer with business information and social media links.
- Use responsive design for mobile, tablet, and desktop screens.
- Use royalty-free images where appropriate.

GitHub Requirements

- Create a GitHub repository for the project.
- Make multiple meaningful commits throughout development.
- Include a README.md file with project description, technologies used, and live link.

Deployment Requirements

- Deploy the project to Vercel.
- Submit both the GitHub repository URL and the Vercel live URL.

Submission Checklist

- Source code uploaded to GitHub
- README file completed
- Website deployed on Vercel
- GitHub repository link submitted
- Live website link submitted

Grading Rubric (100 Marks)

Area	Marks
HTML Structure	20
CSS Styling	20
Responsiveness	20
Content & Design Quality	15
GitHub Usage	10
Vercel Deployment	10

README Documentation	5
